### DETAILED ACTION

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1,9-15,18,19, drawn to structure of plasma display, classified in class 315, subclass 169.1, 169.2 and class 313, subclass 485,495,581.
  - II. Claims 2-8,16,17, drawn a method of driving a PDP with reset period and an address period, classified in class 34, subclass 60.
2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because a display having electrodes on a upper and substrate and between a pair of electrodes, while the claims in groups II a driving circuitry for supplying reset period to a trigger electrodes. The subcombination has separate utility such as computer display or any other display such as LCD.
3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions because the group I a structure of display while the group II supplying the reset period to a trigger electrode and scan pulse to trigger electrodes.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
